

**Worldwide Premium Hoist from Japan  
Sooner or later you will choose "KITO" anyway**

Since its foundation 75 years ago, KITO consistently developed and produced products for efficient lifting and transporting of goods. KITO products are used whenever high standards of quality and safety of hoisting devices are required.

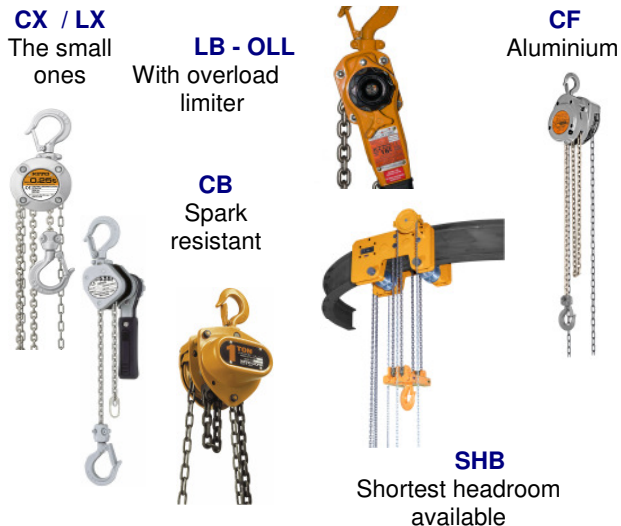

The fundament for development is our know-how, superior technology and our ambition to innovate. Many new developments of the company have set already technological standards contributing to the development of the industry worldwide. KITO is ISO9001 and ISO14001 certified and constantly maintains a strict quality assurance system.

At CeMAT, our new Generation of KITO Electric Chain Hoist will be introduced, featuring an innovative frequency inverter technology.

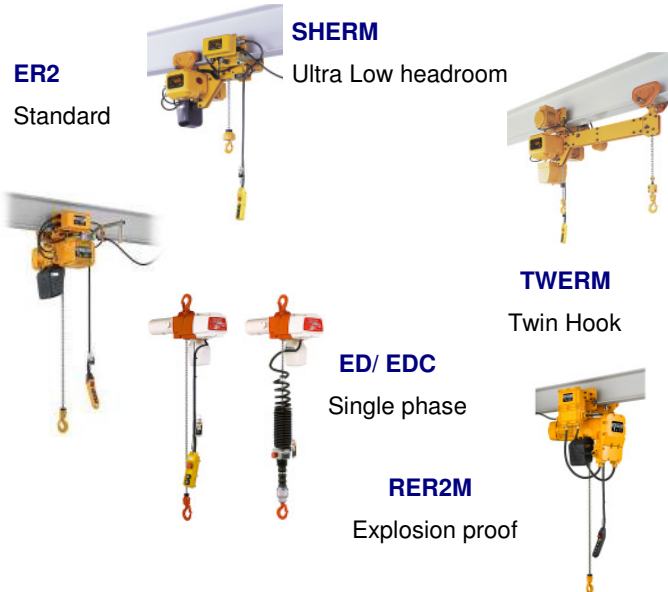

**The new Generation ER2 Electric Chain Hoist  
Features:**

- Innovative frequency inverter technology for dual lifting speeds. The 6:1 speed ratio is pre-set in the factory as standard, but it can be adjusted individually up to a ratio of 12:1. This enables the user to position the load even more precisely.
- The newly developed load sheave in combination with adopting an advanced chain processing technology ensures reliable safety and increases the durability of the load chain.
- Load sheave with 5 resp 6 pocket system – depending on the model. This innovation guarantees a smooth and low-noise level operation.
- Newly designed electro magnetic brake. As the brake unit require service first after 2 million brake applications, a significantly longer service life is guaranteed.
